

Watertight quality with allure

Bouwplast-*plus* plastic construction panels

- unique, watertight click connection
- easy, quick and simple to assemble
- do not rust and are colour-fast
- no need for sealing or grouting between panels
- can be supplied in any desired size for the project
- solid, stable structure - proven system
- resistant to cleaning materials
- excellent value for an attractive price

BOUWIMPEX

Modern plastics for car washes

More and more often when car washes are built or being renovated the choice is made for a completely maintenance-free, plastic interior using Bouwplast-plus plastic panels from Bouwimpex. These Bouwplast-plus panels have a unique, sophisticated click connection forming a watertight joint. It is therefore not surprising that these high quality PVC click panels are increasingly being used to form the dividing walls in car washes.

There are numerous advantages...

Bouwplast-plus panels are easy, quick and simple to assemble and can be produced in virtually any size as desired for the particular project. This means that money will be saved on the ever increasing assembly costs. The panels have a unique watertight click connecting system with rubber seal so that a smooth, even and seamless wall is formed, and therefore there is no need to use sealant or grouting between the panels.

Bouwplast panels do not rust, are colour-fast and resistant to most common chemicals and cleaning materials. As well as this, Bouwplast-plus panels are much cheaper than traditional construction products so that they are the best alternative both for new constructions or the renovation of existing car wash installations.

Technical details

Bouwplast-plus

| | |
|--------------------|--|
| Panel height | 250 mm & 400 mm |
| Panel width | 35 mm |
| Panel length | as desired for the project |
| Wall thickness | 2.5 mm |
| Material | hard PVC (Ca-Zn stabilized) |
| Co-extrusion layer | 0.5 – 0.7 mm |
| Tolerances | in accordance with DIN 16942-3A |
| Weight | 11.5 – 12.0 kg/m ² |
| Extras | U-35 profile strips L-40 profile strips |
